# Our Services for the Energy Market

## Weather. Impact on Your Business.

### Take advantage of our independent expert knowledge!

A superior quality database, the fastest possible data transfer and the optimised use of weather data are invaluable in day-to-day operations in the energy sector, both on the trading side and on the grid operations side.

We can help you to maximise your potential for optimisation. We can develop tailored solutions to meet your needs, irrespective of your framework conditions.

Meteomatics and Meteomind can offer you combined expert knowledge from one source:

benefit from this combined knowledge and expertise, unique in this form, from the fields of

- Energy meteorology
- Forecasting systems
- Mathematics and high-performance computing

We can support you with these solutions:

- **Systems to combine different forecasts for solar and wind**
- **Set-up of in-house forecasting systems**
- **Independent meteorological trading hotline**
- **Improved supplier and product selection**
- **Improved speed of data provision**
- **Weather data processing**

**- independent and professional -**
